

Abstract geometric lines in the top left corner, consisting of several overlapping, irregular polygons and lines in a light beige color.

SYMPTOM CHECKER AI

AI-based Disease Prediction System

Vedant Tomar

25BAI10063

INTRODUCTION

- Healthcare diagnosis is important but time-consuming
- Many people ignore early symptoms
- Many people ignore early symptoms
- This project provides a simple AI-based symptom checker

AWARENESS — People cannot easily identify diseases from symptoms

AWARENESS — Lack of awareness and quick guidance

ACCESSIBILITY — Doctor consultation is not always immediate

PREDICTION — Need for a basic system to assist users

PROBLEM STATEMENT

OBJECTIVE

Prediction

To build a system that predicts diseases from symptoms

Analysis

To use dataset-based analysis for prediction

Guidance

To provide risk level and suggestions

Simplicity

To provide risk level and suggestions

METHODOLOGY

- Take user input (Name, Age, Sex)
- Display list of symptoms
- User selects symptoms
- Compare with dataset
- Calculate match percentage
- Display predicted diseases and risk

DATASET USED

DATASET

Training.csv

CONTAINS

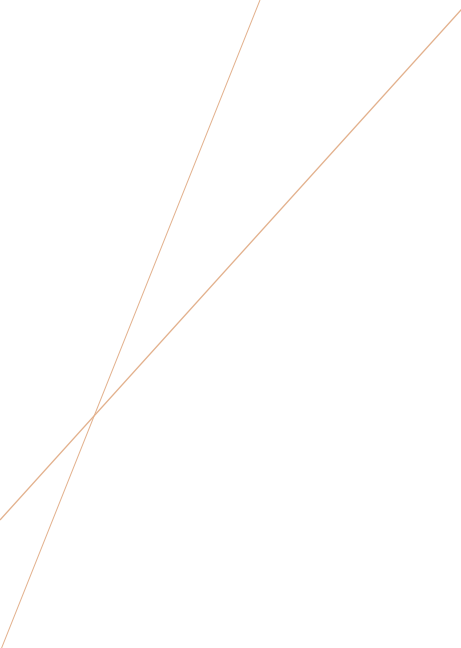

Diseases (Prognosis)

Symptoms (as columns)

SYMPTOMS ARE REPRESENTED AS

1 → Present

0 → Absent

TECHNOLOGIES USED

- Python
- Pandas
- Dataset (CSV File)
- Basic Logic (No ML model used)

ALGORITHM

- Read dataset using Pandas
- Extract symptoms and diseases
- Take user-selected symptoms
- For each disease:
 - > Count matching symptoms
 - > Calculate percentage
- Sort results
- Display top predictions

A series of thin, light-brown lines forming various overlapping triangles and polygons, creating a complex geometric pattern in the top-left corner of the slide.

FEATURES

- User-friendly interface
- Real dataset usage
- Multiple disease prediction
- Risk level classification
- Fast and simple execution

Two thin orange lines intersect on the left side of the slide. One line is horizontal, and the other is diagonal, crossing it.

OUTPUT

- Shows Patient's Detail
- Most Likely Diseases
- Other Possible Diseases
- Match Percentage and Risk

ADVANTAGES & LIMITATION

Advantages

- Easy to use
- Quick Prediction
- Useful for basic Awareness
- Works without Internet

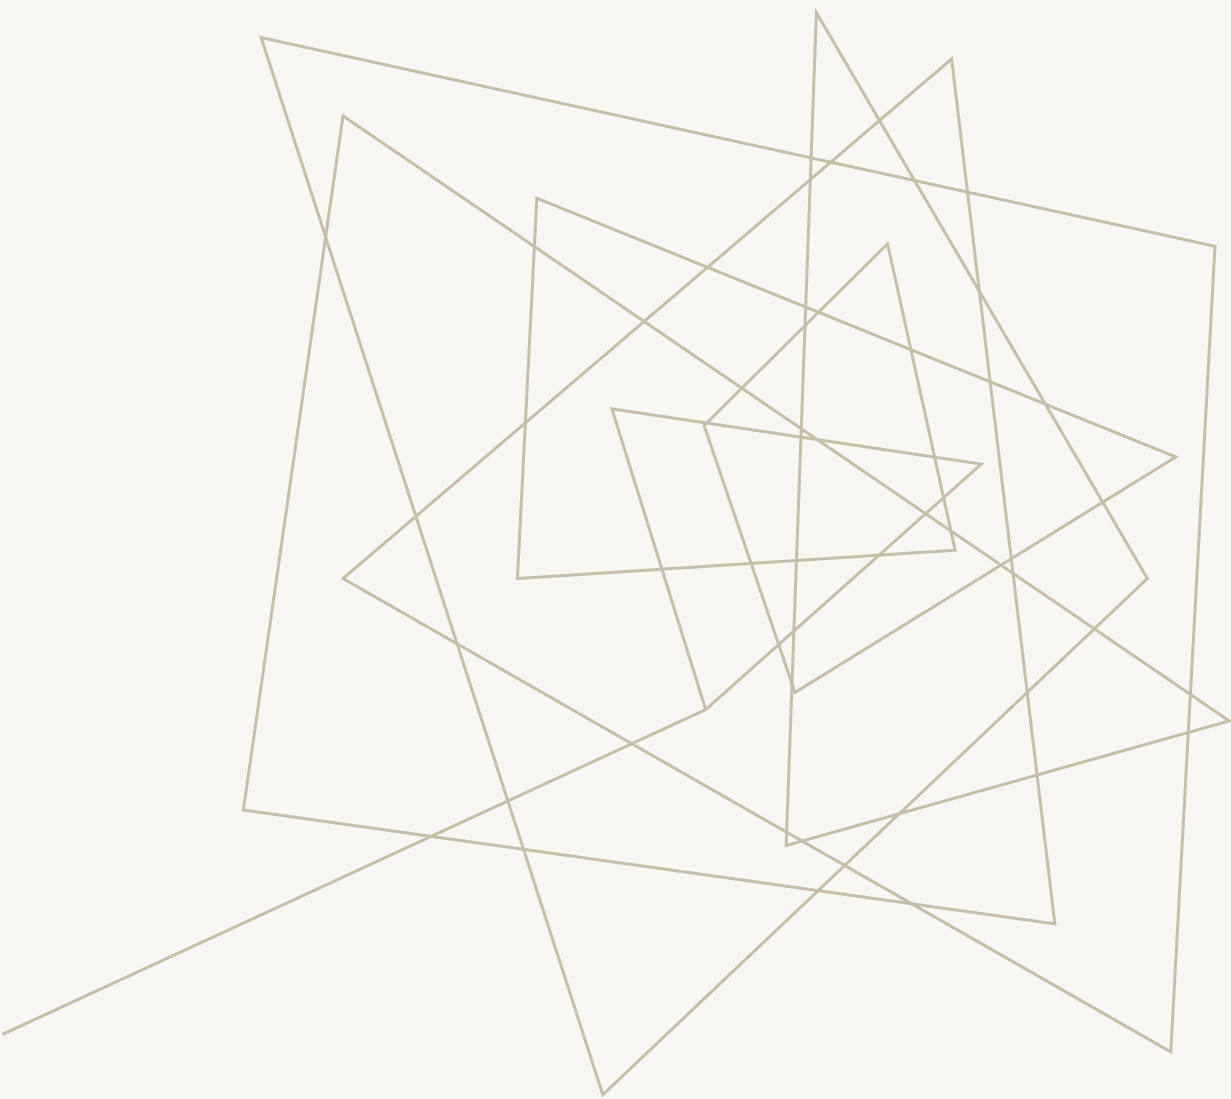

Limitation

- Not 100% accurate
- Not real Medical validation
- Depends on dataset quality
- No severity analysis

Two thin orange lines intersect on the left side of the slide. One line is horizontal, and the other is diagonal, crossing it.

CONCLUSION

- Successfully built a symptom checker system
- Demonstrates use of AI concepts
- Useful for learning and basic predictions
- Useful for learning and basic predictions

REFERENCE

- Kaggle dataset
- Python Documentation
- Pandas Documentation

A series of thin, light brown lines forming an abstract, overlapping geometric pattern on the left side of the slide. The lines intersect to create various polygonal shapes, some of which are filled with a very light brown color.

THANK YOU
